

Agent Roles and Responsibilities

1. CRO Agent

Function: Identifies eligible sites for a CRO Research Study. Also calculates patient compatibility scores and shortlists top patients for an enrolled site.

Example Input: For the Research Study: Pelabresib (CPI-0610) for Myelofibrosis and CRO: Lirik CRO1, identify the sites that are eligible to run the clinical drug trial.

Example Input 2: Calculate the eligibility score for each patient of Enrolled Site ES-0001.

2. Site Agent

Function: Performs initial patient eligibility check (high-level criteria).

Example Input: Perform initial patient-level eligibility screening for ES-0001

3. PCP Agent

Function: Performs detailed PCP-level eligibility check (granular criteria).

Example Input: Check patient eligibility against PCP criteria for patients of Enrolled Site ES-0001
